street 3, westridge 1, Rawalpindi

[Farkhunda Latif](#)

## EDUCATION

Bachelor of Science in  
Software Engineering

**NUTECH (National University of  
Technology)**

2024 – Present

## SKILLS

- Java
- HTML5
- CSS3
- JavaScript
- SQL
- Database Management
- Object-Oriented Programming (OOP)
- Data Structures
- Git & GitHub
- Figma
- Eclipse IDE
- Visual Studio Code

## LANGUAGE

English  
Urdu

## About Me

Motivated Software Engineering student with a strong interest in software development and web technologies. Skilled in Java, HTML, CSS, JavaScript, SQL, and problem-solving through academic projects. Eager to learn new technologies, contribute to innovative teams, and build practical software solutions.

## ACADIMIC PROJECTS

Jan 2026 – Feb 2026

### End Semester Project | Team Collaboration Women Safety System

- Developed a Women Safety System using Java for the user interface and backend logic.
- Designed and managed the SQL database for storing user information and emergency contacts.
- Implemented emergency response features, including location sharing and SOS alert functionality.
- Collaborated with team members to design, develop, test, and integrate system components.
- Focused on improving usability, reliability, and overall system performance.
- Technologies: Java, SQL, Git, IntelliJ IDEA

Jan 2026 – May 2026

### Research Project | Team Collaboration

### Sign Language Recognition System Using CNN-LSTM and MediaPipe

- Developed a deep learning model for sign language recognition using CNN-LSTM and MediaPipe.
- Extracted pose, hand, and facial landmarks and trained the model on the LSA64 dataset.
- Achieved 98.59% accuracy across 64 sign classes with an inference time of 123 ms per sample.
- Optimized data representation to improve model performance for real-time gesture recognition.
- Technologies: Python, TensorFlow, MediaPipe, OpenCV, CNN-LSTM
